SUMMARY

Software Engineer (BS Software Engineering, FAST-NUCES, 2026) with hands-on experience across the full software delivery cycle. Builds responsive web applications in React and develops secure, well-structured back ends and REST APIs with Node.js, Express, Python and MongoDB. Automates builds, security checks and releases with Docker and GitHub Actions CI/CD, deploying to cloud platforms. Brings a quality-first approach from an 8-week QA internship at Tron.ai, supported by automated API and end-to-end testing. Clear communicator who documents work, explains technical products in plain language and follows through.

TECHNICAL SKILLS

Web Development: JavaScript, TypeScript, React.js, Tailwind CSS, HTML5, CSS3, responsive design, Node.js, Express.js, Flask, REST APIs, JWT

Languages & Databases: Python, Java, C++, SQL, MongoDB, PostgreSQL, MySQL

QA & Testing: Functional, Regression, API and E2E Testing; Cypress, Selenium, Playwright, Pytest, Jest, Postman

DevOps & Tools: Git, GitHub Actions (CI/CD), Docker, Nginx, Linux, Render, Vercel, Jira, TestRail, AI tools

Communication & Collaboration: Professional English (spoken and written); product demos and presentations; explaining technical topics to non-technical people; clear tracking, handoff notes and follow-up

EXPERIENCE

Sales & Business Development, Beetoo Soft (footwear manufacturer) Recent | Sindh

Managed online sales and worked with the marketing team on campaigns and product listings. Travelled across Sindh, mainly Karachi and Hyderabad, to meet retailers and win new customers, drawing on a family business background and strong trade connections in clothing and footwear.

QA Intern, Tron.ai 8-week internship | Lahore

Manual and API testing of web apps, with bug reporting in Jira.

FINAL YEAR PROJECT

ShopO-AI: AI Price Comparison & Product Authenticity Platform 2025 – 2026

React, Node.js, Express, MongoDB, TensorFlow.js, Docker, GitHub Actions | Live: shopo-ai.onrender.com

- Compares live prices across Amazon, eBay, AliExpress and Daraz and checks if a product is genuine, with an AI "Best Pick" ranking.
- 44 Jest/Supertest tests and a GitHub Actions + Docker pipeline; deployed on Render with MongoDB Atlas.
- Presented and demoed the product to the evaluation panel, explaining its value to everyday users and answering questions on accuracy and reliability.

PROJECTS

- **Pramas Perfumes**: responsive e-commerce store for a Pakistani perfume brand with cart, coupons, COD checkout, order tracking and admin panel (React, Express, MongoDB); 42 API tests, Docker, CI. *Live demo* | *github.com/muhammad-waseel/pramas-perfumes*
- **TaskFlow**: full-stack task manager with JWT login, priorities, due dates and filters (React, Express, MongoDB); 34 API tests, GitHub Actions CI, Docker, live on Render. *Live demo* | *github.com/muhammad-waseel/taskflow*
- **Cypress E2E Test Framework**: 38 Page Object Model tests for TaskFlow in Chrome and Firefox on every push. *github.com/muhammad-waseel/taskflow-e2e-cypress*
- **Automated CI/CD Pipeline**: 6-stage GitHub Actions pipeline (tests, npm audit + CodeQL, Docker build & smoke test, GHCR, Render deploy, live-commit check) for ShipIt, a status page for my apps. *Live demo* | *github.com/muhammad-waseel/shipit-cicd-pipeline*

EDUCATION

BS Software Engineering, FAST-NUCES, Peshawar Graduated 2026

Certifications: Full-Stack Web Development (Coursera) | Agile Project Management with JIRA (Coursera)

LANGUAGES

English (Professional) | Urdu (Native)
